

# ADITYA NITURE

Chicago, IL(Open to relocate) | [adityaniture07@gmail.com](mailto:adityaniture07@gmail.com) | 312 539-7157 | [linkedin.com/aditya-niture](https://www.linkedin.com/in/aditya-niture) | [github.com/aniture](https://github.com/aniture) | [portfolio](#)

## PROFESSIONAL SUMMARY

Versatile **Forward Deployed Software Engineer** with 3+ years of experience specializing in **Django, Next.js, PostgreSQL**, and **AI-augmented development**, demonstrated by architecting and delivering **six to eight concurrent full-stack applications** across diverse verticals. Skilled at unifying technical execution with client strategy by simultaneously operating as **developer, business analyst, and project manager**, while harnessing **Claude Code** and **custom Model Context Protocol servers** to compress delivery timelines, sustain production-grade reliability, and generate measurable business outcomes across cross-functional client engagements, following a Palantir-style forward deployed model.

## EDUCATION

Illinois Institute of Technology, Chicago, IL, USA

May 2025

**Master of Science, Computer Science**

Relevant Coursework: Artificial Intelligence, Machine Learning, Data Preparation and Analysis, Advanced Database Organization, Design and Analysis of Algorithms, Big Data Technology.

M.S. Bidve College of Engineering, Latur, MH, INDIA

May 2022

**Bachelor of Technology, Computer Science**

Relevant Coursework: Operating Systems, Computer Networks, Object-Oriented Programming, Computer Architecture and Organization, Data Structure and Algorithms, Compiler Design.

## WORK EXPERIENCE

### FORWARD DEPLOYED SOFTWARE ENGINEER

Benmore Technologies, Chicago, IL, USA

January 2026 - Present

- Orchestrated end-to-end delivery of eight concurrent **production Django and Next.js** applications spanning **healthcare, aviation, real estate, and fintech verticals**, governing Full-stack builds from **PostgreSQL** schema design through **React** frontend implementation with **Supabase** and **Cloudinary**, sustaining **99.8%** uptime.
- Directed stakeholder consultations as **technical lead, product manager, and business analyst** across **12+ client engagements**, synthesizing ambiguous requirements into executable **scope agreements** and **technical architectures** that compressed approval timelines by **30%** while mentoring junior engineers on delivery practices.
- Refined database query performance and integrated **Redis** caching layers across **PostgreSQL** and **Supabase backends** serving concurrent client workloads, cutting page load times by **28%**, trimming server costs by **18%**, and fortifying infrastructure to absorb **15x** higher request volumes without service degradation.
- Instituted automated testing suites, **CI/CD pipelines**, and **rate limiting** mechanisms across project repositories, eradicating **85%** of production defects through preventative quality gates and attaining **96%** test coverage across **Django REST APIs** and **Next.js** modules to safeguard deployment reliability.
- Pioneered **Claude AI** integration with custom **Model Context Protocol** servers to automate code scaffolding, documentation generation, and project context retrieval, compressing feature development cycles by **40%** while preserving code quality across data prediction models, ORM pipelines, and enterprise client applications.
- Formulated comprehensive **technical architecture blueprints, data flow diagrams, and system design specifications** for **12+ cross-vertical projects**, accelerating junior developer onboarding by **50%** and standardizing reusable API design patterns that reduced per-project architecture planning effort by **35%** across the portfolio.

### SOFTWARE ENGINEER

Ping Cares, Chicago, IL, USA

January 2025 – January 2026

- Spearheaded mobile app enhancements with **Flutter** and **React Native**, improving accessibility and reducing manual intervention by **40%** while boosting user engagement by **25%**, which resulted in **faster feature releases** and **smoother user onboarding** across **iOS and Android platforms**.
- Revamped backend services and APIs with **Ruby** and **Node.js**, achieving a **15%** reduction in response times and improving scalability for production deployments and the optimized endpoints directly improved **app responsiveness** and **overall system reliability** under increasing user load and concurrent mobile traffic patterns.
- Designed data pipelines and **ML models** to analyze wearable data, enhancing predictive insights by **20%** and enabling real-time event detection which enabled actionable analytics to be integrated seamlessly into the mobile app's core features supporting **proactive monitoring** and **personalized user experiences** at scale.
- Built and deployed a **real-time alert system** leveraging **Python** and **PyTorch**, increasing caregiver response efficiency by **30%** and supporting cross-platform integration with mobile apps which also provided **scalable notification handling, improving alert delivery speed under high traffic conditions**.
- Collaborated with **product managers, designers, and backend engineers** to translate feature requirements into polished mobile experiences, ensuring alignment with product goals and consistent **UI/UX quality** across releases while incorporating user feedback, analytics insights, and improvements throughout development cycles.
- Contributed to **code reviews, CI/CD pipelines**, and automated testing workflows, helping maintain **98%+ crash-free reliability** and improving long-term maintainability of production mobile applications by enforcing best practices, refactoring legacy code, and reducing technical debt.

### BACKEND/ML ENGINEER

Unilife, Pune, India

August 2021 - June 2023

- Designed, built and deployed **microservices** using **Node.js** and **TypeScript**, improving API performance by **20%** and powering SaaS workflows for **50,000+** users, and **these** services supported high-concurrency environments with **minimal latency and downtime**.
- Containerized and hosted services on **GCP** with automated **CI/CD** pipelines, cutting deployment time by **40%** and ensuring **99.9% uptime** and the automation reduced human error and accelerated the release cycle for production builds while improving rollback safety and environment consistency across services.
- Implemented **REST/GraphQL** APIs and caching layers, reducing server load by **25%** and streamlining **frontend-backend integration** for **React Native apps**, and the improved infrastructure also **boosted data fetch speeds and enhanced client-side rendering efficiency** across diverse devices and varying network conditions.
- Partnered with frontend teams to deliver seamless mobile and web interfaces, reducing defect leakage by **30%** and improving cross-team collaboration through thorough code reviews, this cross-functional collaboration ensured consistent UI/UX and maintained high code quality across releases.
- Supported architecture decisions focused on **scalability, fault tolerance, and clean API design**, strengthening the foundation for long-term growth of cross-platform mobile and backend systems while accommodating increased traffic, evolving business requirements, and future feature expansion.

## SKILLS

- Programming Languages:** Python, Java, JavaScript, C#, SQL, Kotlin, Swift, Ruby, TypeScript, C/C++, Dart, Rust, Go.
- Databases & Data Storage:** MongoDB, PostgreSQL, SQL Server, MySQL, SQLite, Supabase, Snowflake, DynamoDB, Cassandra, Redis, Elasticsearch/OpenSearch.
- Frameworks, Application Development & Web:** Django, Next.js, React Native, .NET Core, React.js, Node.js, Vue.js, Angular.js, Spring/Spring Boot, Flask, RESTful APIs, FastAPI, GraphQL, Vite, TanStack Query, Express.js, Android Development (Android Studio), iOS Development (Swift, Xcode), Flutter, Kafka.
- Data Science, Machine Learning & Big Data:** Deep Learning, NumPy, Pandas, Scikit-Learn, TensorFlow, Keras, Jupyter Notebook, PyTorch, RAG, NLP, Algorithm Development, Model Training, LangChain, Data Visualization (Tableau, Power BI).
- Cloud, DevOps & Tools:** AWS (Lambda, S3, SQS, EC2), GCP, Azure, Docker, Kubernetes, CI/CD Pipelines, GitHub, Bash Scripting, Linux Systems, TCP/IP, Apache, Airflow, Microservices, DBA, Spark, Hadoop.
- Agile Development Methodologies:** Scrum, Sprints, Bamboo, Kanban Boards, Jenkin, Spinnaker, Jira, Extreme Programming (XP), Agile Modeling.
- Soft Skills:** Cross-functional Leadership, Client Stakeholder Management, Business Analysis, Technical Consulting, Project Management, Team Mentorship, Requirement Gathering, Onboarding & Knowledge Transfer.

## CERTIFICATIONS

- AI Engineering with Anthropic: MCP, Agent Skills, Claude Code & API March 2026
- AWS Solutions Architect Advanced Certificate May 2025
- IBM Data Science Professional Certificate July 2024
- Java Full Stack Developer by SEED Infotech, Pune July 2023
